

Sparking creativity. Supporting music-making

Charanga Secondary is a cloud-based music education programme that enables teachers to seamlessly integrate music tech into their music lessons, capitalising on pupils' confidence and facility with technology.

Everything in one place

YuStudio, Charanga's browser-based digital audio workstation (DAW), is integral to the programme. Together with Charanga Secondary's specialist content, it offers students the perfect introduction to digital multitrack recording and sequencing. You'll find everything in one place.

- **YuStudio** – an award-winning, full-featured DAW – **with no seat limits**.
- **Ready-made projects** supporting YuStudio's use.
- Workspaces to **set and assess work online**.
- **A Bonus Library of resources** to enhance your curriculum and more.

Music production made simple with YuStudio

YuStudio, Charanga's beginner-friendly DAW, allows aspiring young producers to make music whenever they're online and save their work in the cloud.

Why YuStudio?

- The DAW has been **purpose-built for use in schools and educational settings**, so is more accessible and easier to use.
- There's **no software to install**. The tool is accessible via a web browser, enabling users to make music at their own pace, anywhere.
- Teachers and young people have helped shape its design. An **intuitive interface** makes it perfect for anyone who might find other DAWs too complex or intimidating.
- **Artist packs, loops and sounds** from top musicians like premier percussionist Evelyn Glennie – are included.
- Users can access a **library of feature-led video tutorials, specialist content and YuStudio projects** to get the most from it.

'YuStudio provides an easily accessible solution to delivering electronic music tuition. It removes the need for a lot of expensive hardware and set-up and facilitates the online collaborative approach underpinning much of contemporary pedagogy – a powerful tool which sounds great and has a familiar workflow to its desktop-based competitors.'

– Music Teacher Magazine

YuStudio Projects

- The upgraded version of the award-winning **VIP Studio Sessions** explores contemporary genres, music technology and production. Students learn how to create music and develop tracks in YuStudio, aided by expert tutorials. They can go more deeply into a unit to refine their compositions.

- **Music and the Modern World** offers six progressive units covering popular curriculum themes, which you can use independently or combine with your own materials. Teaching and learning support and guided listening activities are included.

Online workspaces

'My Workspace' for teachers

- Create and share content, whether using Charanga resources or your own.
- Set up students with access to Yumu online learning.
- Quickly access students' work for feedback and assessment. Monitor their progress.

'Yumu', a password-protected online learning space for students

- Unlimited access to projects, resources and assignments shared by their teacher.
- Full access to YuStudio and all Charanga apps to create pieces of work.
- The ability to build and share a portfolio showcasing tracks and musical experiences.

The Library

Access a treasure chest of additional content to support your planning and in-class teaching. You've everything from interactive **Rockschool Method Books** supporting young drummers, electric guitarists, bassists, and ukulele and piano players to creative classroom apps and bespoke projects for special needs students. Use them independently or combine them with your own resources.

Access for all

A single Charanga Secondary licence gives every teacher and student in a school access to everything the programme provides – including YuStudio. There is no limit to the number of students you can set up with a Yumu account. Multiple licences aren't required.
